

USER MANUAL

ADVANCED CUSTOM LINKS - MAGENTO 2

BY

Advanced Custom Links module provides features to manage top menu and customer account sidebar. It provides flexibility to store owners to manage these links from the admin panel without doing changes at code level.

A new link can be added in the top menu before or after any of the existing categories. You can also manage the category to be used as the parent category to show its child categories in the top menu. Custom links can be added to the customer my account sidebar and the existing link in it can be repositioned. So this module makes it easy to manage the link of the top menu and customer sidebar.

Table of contents

1. Introduction and Purpose
2. How to enable extension?
3. Add new link to Top Menu
4. Change Root category for Top Menu
5. Add new link to Customer my account sidebar
6. Update label and position of existing links in Customer my account sidebar

1. Introduction and Purpose

Purpose of this module is to make it easy to manage the links of the top menu and customer my account sidebar. Users can add new links and change the root category for the top menu from backend. Also new links can be added. Label and position of existing links can be changed in the customer my account sidebar.

2. How to enable extension?

Once you get the license key (refer to installation guide) you need to navigate to the Advance Custom Links section under **Stores > Configuration > WebbyTroops**. Once you have added the valid key you will be able to enable this extension. Below is the screenshot where you need to add that license key.

Scope: Default Config ? Save Config

✓ You saved the configuration.

General Settings ↻

Enable [store view] Yes

License Key [global] wtHBVfwj9oHknj45xUCeVyHKC0SLK0t1n6

Top Menu Links ↻

Enable [store view] Yes

3. Add new link to Top Menu

You can add a new link to the Top Menu after or before any existing category in the menu. Links can also be added before or after sub-categories shown under any category in the menu as shown in the image below.

To add a new link to Top menu move to:

Stores -> Configuration -> WebbyTroops -> Advanced Custom Links -> Top Menu Links

OR

WebbyTroops -> Advanced Custom Links -> Top Menu Links

- 3.1. Enable this feature
- 3.2. Add Title
- 3.3. Add URL (This can be only Magento path 'about-us' or complete link 'https://DOMAIN/about-us')
- 3.4. Select Category (Around which the link will be shown)
- 3.5. Select Position (Show before or after the above selected category)
- 3.6. Save Config
- 3.7. Cache Flush

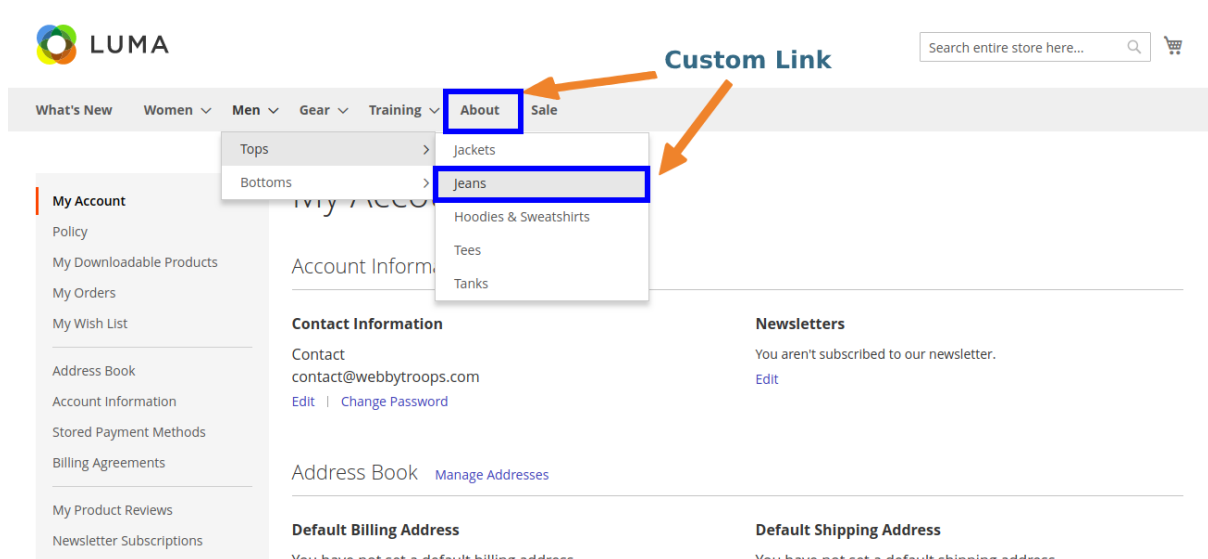

Add new link in Top menu:

1. Add Title for the new link
2. Add its URL e.g. only Magento path (about-us) or complete link (http://DOMAIN/about-us)
3. Select Category around which the link will be shown
4. Select position of the new link, like it will be shown before or after the selected category.

Enable [store view]	Top Menu Links [store view]	
	Title	URL
<input checked="" type="checkbox"/>	About	http://127.0.0.1/ma
<input checked="" type="checkbox"/>	Jeans	jeans
<input type="button" value="Add More"/>		

URL can be entered as only path 'about-us' or complete link 'https://DOMAIN/about-us'.

4. Change Root category for Top Menu

Selected category will be treated as the root category for Top Menu and its sub-categories will be visible in the top menu.

To change the parent category of Top menu move to:

Stores -> Configuration -> WebbyTroops -> Advanced Custom Links -> Manage Top Menu Root Category

OR

WebbyTroops -> Advanced Custom Links -> Manage Top Menu Root Category

- 4.1. Enable this feature
- 4.2. Select the new Root category
- 4.3. Save Config
- 4.4. Cache Flush

5. Add new link to Customer my account sidebar

Custom links can be added to the customer my account sidebar from the admin panel.

To add new link go to:

Stores -> Configuration -> WebbyTroops -> Advanced Custom Links -> Customer Account Sidebar

OR

WebbyTroops -> Advanced Custom Links -> Customer Account Sidebar

- 5.1. Enable this feature.
- 5.2. Add Title
- 5.3. Add URL (this can be only Magento path 'about-us' or complete link 'https://DOMAIN/about-us')
- 5.4. Add Position (it should be unique and greater than 0)
- 5.5. Save Config
- 5.6. Cache Flush

Configuration

Advanced Custom Links

Customer Account Sidebar

Enable [store view] Yes

Title	URL	Position	Action
My Orders	sales/order/history	4	
Policy	policy	2	

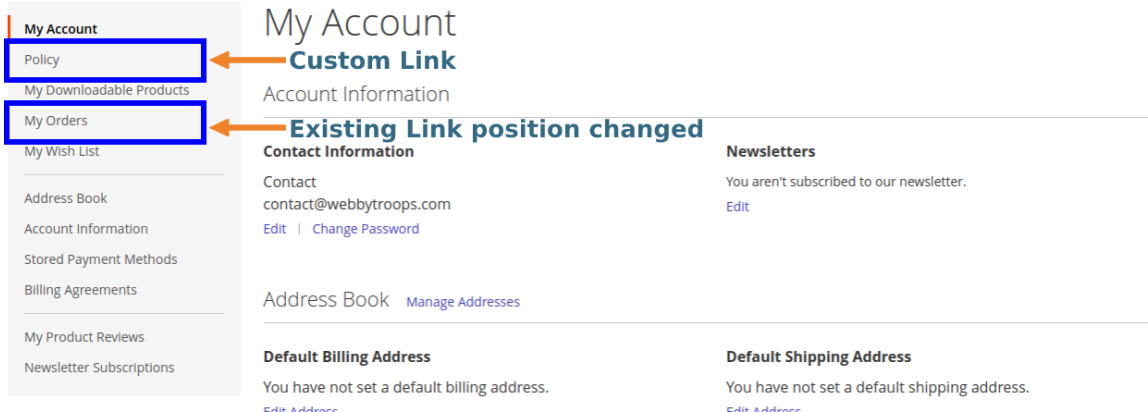

[Add More](#)

Add new link in Customer Sidebar:

1. Add Title for the new link
2. Add its URL e.g. only Magento path (policy) or complete link (http://DOMAIN/policy)
3. Enter position of the new link (unique and greater than 0)

NOTE: To modify title or position of existing link keep the URL same e.g. for My Orders URL will be (sales/order/history)

1. URL can be entered as only path 'about-us' or complete link 'https://DOMAIN/about-us'.
 2. Please keep position unique and greater than 0.
 3. To update label or position of existing links enter the path/link of the existing link and use the new label or position. e.g. to change My Orders label or position use the path 'sales/order/history'.

6. Update label and position of existing links in Customer my account sidebar

Label and position of existing links in the customer my account sidebar can be updated using this.

To update existing links go to:

Stores -> Configuration -> WebbyTroops -> Advanced Custom Links -> Customer Account Sidebar

OR

WebbyTroops -> Advanced Custom Links -> Customer Account Sidebar

- 6.1. Enable this feature.
- 6.2. Add Title
- 6.3. URL: To change label or position of existing link enter the existing URL e.g. to modify My Orders use 'sales/order/history' in path).
- 6.4. Add Position
- 6.5. Save Config
- 6.6. Cache Flush

Note: Check screenshot attached in previous point.
